## SEA AWARDED SOLDIER SYSTEM RESEARCH AND DEVELOPMENT CONTRACT

Cohort, the independent technology group, is pleased to announce that its SEA subsidiary has been contracted by a UK government agency to lead a team in the area of Soldier System Research and Development. The contract has an initial value of £700,000 for 2018 but is likely to continue until 2021, with a potential total value in excess of £3m.

Under the contract, SEA will lead a team of specialist companies to develop a weapon system that combines novel and emerging small arms technologies to produce an integrated system that will deliver greater efficacy for the individual soldier on the battlefield.

**Andy Thomis, Chief Executive of Cohort, said:**

"This contract recognises our position at the forefront of Soldier System Research and Development and our capability as a prime contractor. This contract award, together with other recent wins, enhances the visibility of future Group revenue."
